Reply To Restriction Requirement

Commissioner for Patents PO Box 1450 Alexandria, VA 22313-1450

Sir:

In reply to the Office Action dated **June 26, 2003**, requesting an election of one invention to prosecute in the above-referenced patent application, Applicants hereby provisionally elect to prosecute the invention of Group I, represented by claims 1-6. This election is made without prejudice to or disclaimer of the other claims or inventions disclosed.

This election is made with traverse.

Group I (claims 1-6) is drawn to a method of identifying a compound that modulates sister chromatid separation. Group II (claims 7-9) is drawn to a peptide that can be used to develop compounds that modulate sister chromatid separation. Group III (claim 10) is drawn to a compound identified by the method in Group I that modulates sister chromatid separation. All three groups are directed toward the identification of compounds or individual compounds that modulate sister chromatid separation. As a result, a prior art

search for Group I would encompass Group II and Group III rather then requiring separate searches as the Examiner states.

Furthermore, even where two patentably distinct inventions appear in a single application, restrictions remain improper unless the Examiner can show that the search and examination of both groups would entail a serious burden. *See* M.P.E.P. § 803.

Reconsideration and withdrawal of the Restriction Requirement, and consideration and allowance of all pending claims, are respectfully requested.

It is not believed that extensions of time are required, beyond those that may otherwise be provided for in accompanying documents. However, if additional extensions of time are necessary to prevent abandonment of this application, then such extensions of time are hereby petitioned under 37 C.F.R. § 1.136(a), and any fees required therefor are hereby authorized to be charged to our Deposit Account No. 19-0036.

Respectfully submitted,
